

HEATED LOUNGER STYLE

USA

Thermal lounge for relaxing or resting areas, particularly suitable to combine with the use of sauna, steam bath, and hydrotherapy sessions.

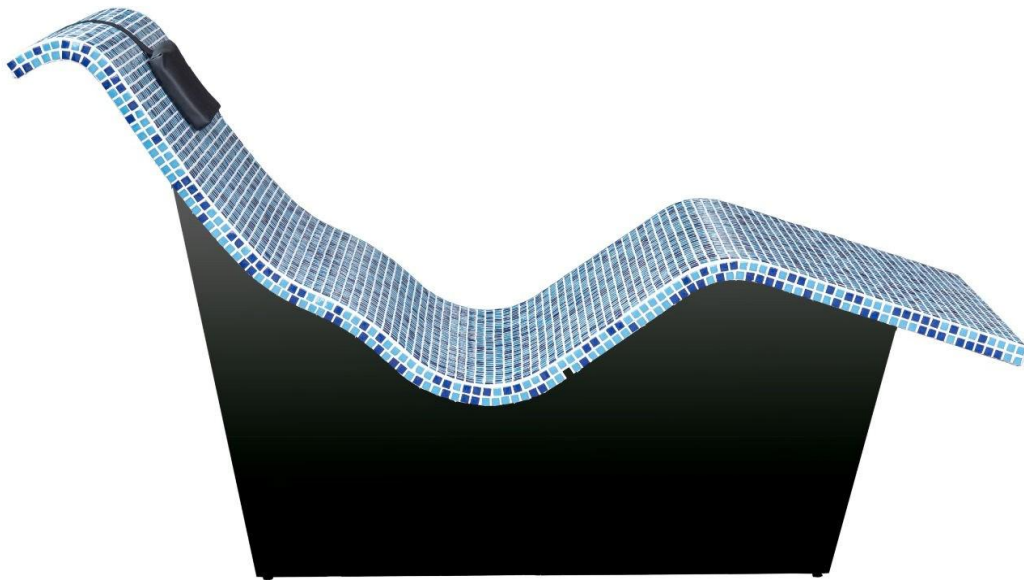

own custom combination on demand.

Great design and totally ergonomic:

- Its lumbar support will adapt perfectly to people with different heights
- A height of 50 cm from the ground at its lowest point makes the access ideal to lay down and to get up comfortably.
- All measurements and inclinations of the lounger are designed for a perfect adaptation of the body to the lounger, the legs are raised above the height of the heart and that is no coincidence. The heart sends the blood to the feet, but that blood must return, this return is not easy

Combined heat and ergonomic bring numerous therapeutic benefits:

- Relaxes the whole muscular system
- Stimulates metabolism
- Improves circulation system
- Intensifies the sense of well-being after other therapies

Height-adjustable leatherette head support.

OPTION: WIFI thermostat control and ALEXA integration, the user can use a smartphone or any other digital device to control the thermostat.

- Turn on and off the device from anywhere with an internet connection
- The possibility of changing the temperature or any other set up without having to get up from the lounger.
