

HEATED LOUNGERS PASITEA WOOD DESIGN

The PASITEA heated lounger is perfect for hotels, wellness areas, and relaxation spaces. This exclusive, handcrafted lounger stands out in any SPA setting with its avant-garde design that combines the quality of Iroko wood and Choc glass mosaic.

- Made of plywood and treated Iroko wood.
- The surface is coated with 25 x 25 mm Choc vitreous mosaic (gresite) with high-performance elastic and waterproof adhesive.
- Custom combinations can be created upon request.
- The PASITEA lounger features an easy-to-use digital thermostat that allows you to adjust the temperature to your preference.
- Includes a height-adjustable leatherette headrest.

Great design and fully ergonomic, the PASITEA is an innovative product that combines the relaxation of a lounger with the benefits of heat therapy.

- Its lumbar support adapts perfectly to people of different heights.
- With a height at its lowest point of 400 mm, it allows for very comfortable access to the lounger.
- All measurements and inclinations of the lounger are designed to ensure perfect adaptation of the body.
- The legs are raised above heart height to improve circulation by countering the effects of gravity, preventing blood accumulation in the legs.

The combination of heat and ergonomics provides numerous therapeutic benefits:

- Relaxes the entire muscular system.
- Stimulates metabolism.
- Improves circulation.
- Intensifies the feeling of well-being after other therapies.
- Heat therapy can also improve mental and emotional health by reducing symptoms of anxiety and depression.
